

STUDENT SPOTLIGHT

NATHANIEL DIETZWAY

Nate Dietzway is a level 2 student in the Automotive Collision Repair Program at CAT North. He decided to attend CAT North once he saw the automotive shop while touring the school in his 8th grade year. Working in the shop is one of Nate's favorite parts of attending CAT North but he says the best things about attending CAT North is being with his friends.

Nate's passion for cars begin early as he worked on a variety of cars with his father and grandfather growing up. His experience before CAT North was more in the Automotive Technology area and his current experience in the Automotive Collision program is expanding his expertise even more. Nate's current project outside of school is working on a Plymouth 1947 with his grandfather.

After high school, Nate will be relocating to Florida with his family and he hopes to work for Nascar. While his ultimate dream job would be to become a driver, he would love to become a member of the pit crew. We look forward to seeing Nate reach his goals!

Congratulations, Nate! We're so proud of you!
